

Crafting Solutions for the Natural Gas and Electric Industry

Job Opportunity

Quality Technician

GTS provides natural gas and electric utility clients with engineering, construction, operation, maintenance, and strategic consulting services. GTS understands that there is not a one size fits all application for management or operational needs in these challenging industries. We firmly believe that every client and, more importantly, every project is unique. To help achieve client objectives, our consulting, engineering, project management, and construction management support is customized to support our clients' dynamic project needs.

Our leadership team consists of former utility executives experienced in engineering, construction, operation and maintenance of natural gas pipeline and electric transmission & distribution systems.

The GTS corporate office is located in Chico, California.

DATE OF POSTING: December 2011

POSITION REPORTS TO: Partner or Senior Manager

SUMMARY

The Quality Technician will develop and implement quality assurance and quality control programs; including tracking, analyzing, reporting and problem solving. The quality technician may be required to: 1) perform quality assurance reviews, 2) support process improvement initiatives in a variety of product or service settings, 3) establish quality control programs, and 4) analyze and interpret information and data.
