

Crafting Solutions for the Natural Gas and Electric Industry

Job Opportunity

Senior Engineer – Regulatory Compliance Group

GTS provides natural gas and electric utility clients with engineering, construction, operation, maintenance, and strategic consulting services. GTS understands that there is not a one size fits all application for management or operational needs in these challenging industries. We firmly believe that every client and, more importantly, every project is unique. To help achieve client objectives, our consulting, engineering, project management, and construction management support is customized to support our clients' dynamic project needs.

Our leadership team consists of former utility executives experienced in engineering, construction, operation and maintenance of natural gas pipeline and electric transmission & distribution systems.

The GTS corporate office is located in Chico, California.

DATE OF POSTING: February 10, 2012

POSITION REPORTS TO: Partner

SUMMARY:

Under supervision and with latitude for independent action or decision, the Senior Compliance Engineer performs responsible engineering work on a professional level in analysis and design of engineering jobs, projects, or parts thereof.
