

# PIPELINE MAINTENANCE

## NEED-TO-KNOW ACTIVITIES TO MEET COMPLIANCE

PHMSA's Mega-Rule has updated the requirements for maintenance of pipeline facilities to meet compliance. How are operators going to comply with 49CFR, Part 192 – Subpart M? If you have not done so yet, update your maintenance programs in order to demonstrate physical and recordkeeping fulfillment of the need-to-know activities listed below:

Patrolling and  
Line Markers

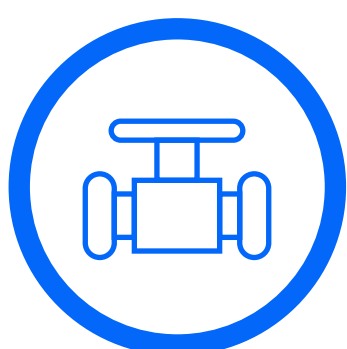

Leak Survey

Repairs to  
Assets

Abandonment  
of Assets

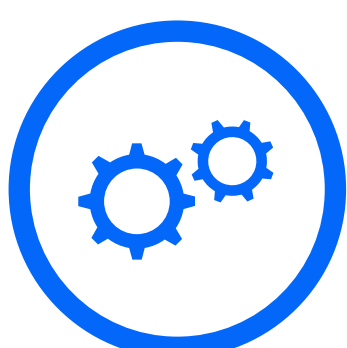

Relief Valve  
Maintenance &  
Capacity Checks

Storage of  
Combustible  
Material

Compressor  
Stations Gas  
Detection

Throttling and  
Control Station  
Maintenance

Valve Inspections  
and Maintenance

Vault  
Inspections

Prevention of  
Accidental  
Ignition

Joint Repairs &  
Protection of Cast  
Iron Mains

Assessments  
Outside of High  
Consequence Areas

Analysis of  
Predicted Failure  
Pressure

Test Requirements  
for Reinstating  
Service Lines

Launcher and  
Receiver Safety

Equipment  
Maintenance and  
Calibration
